

MEMORANDUM

TO: Leigh Bridges, Assistant Director

FROM: Andrew Kolek, Marine Fisheries Biologist

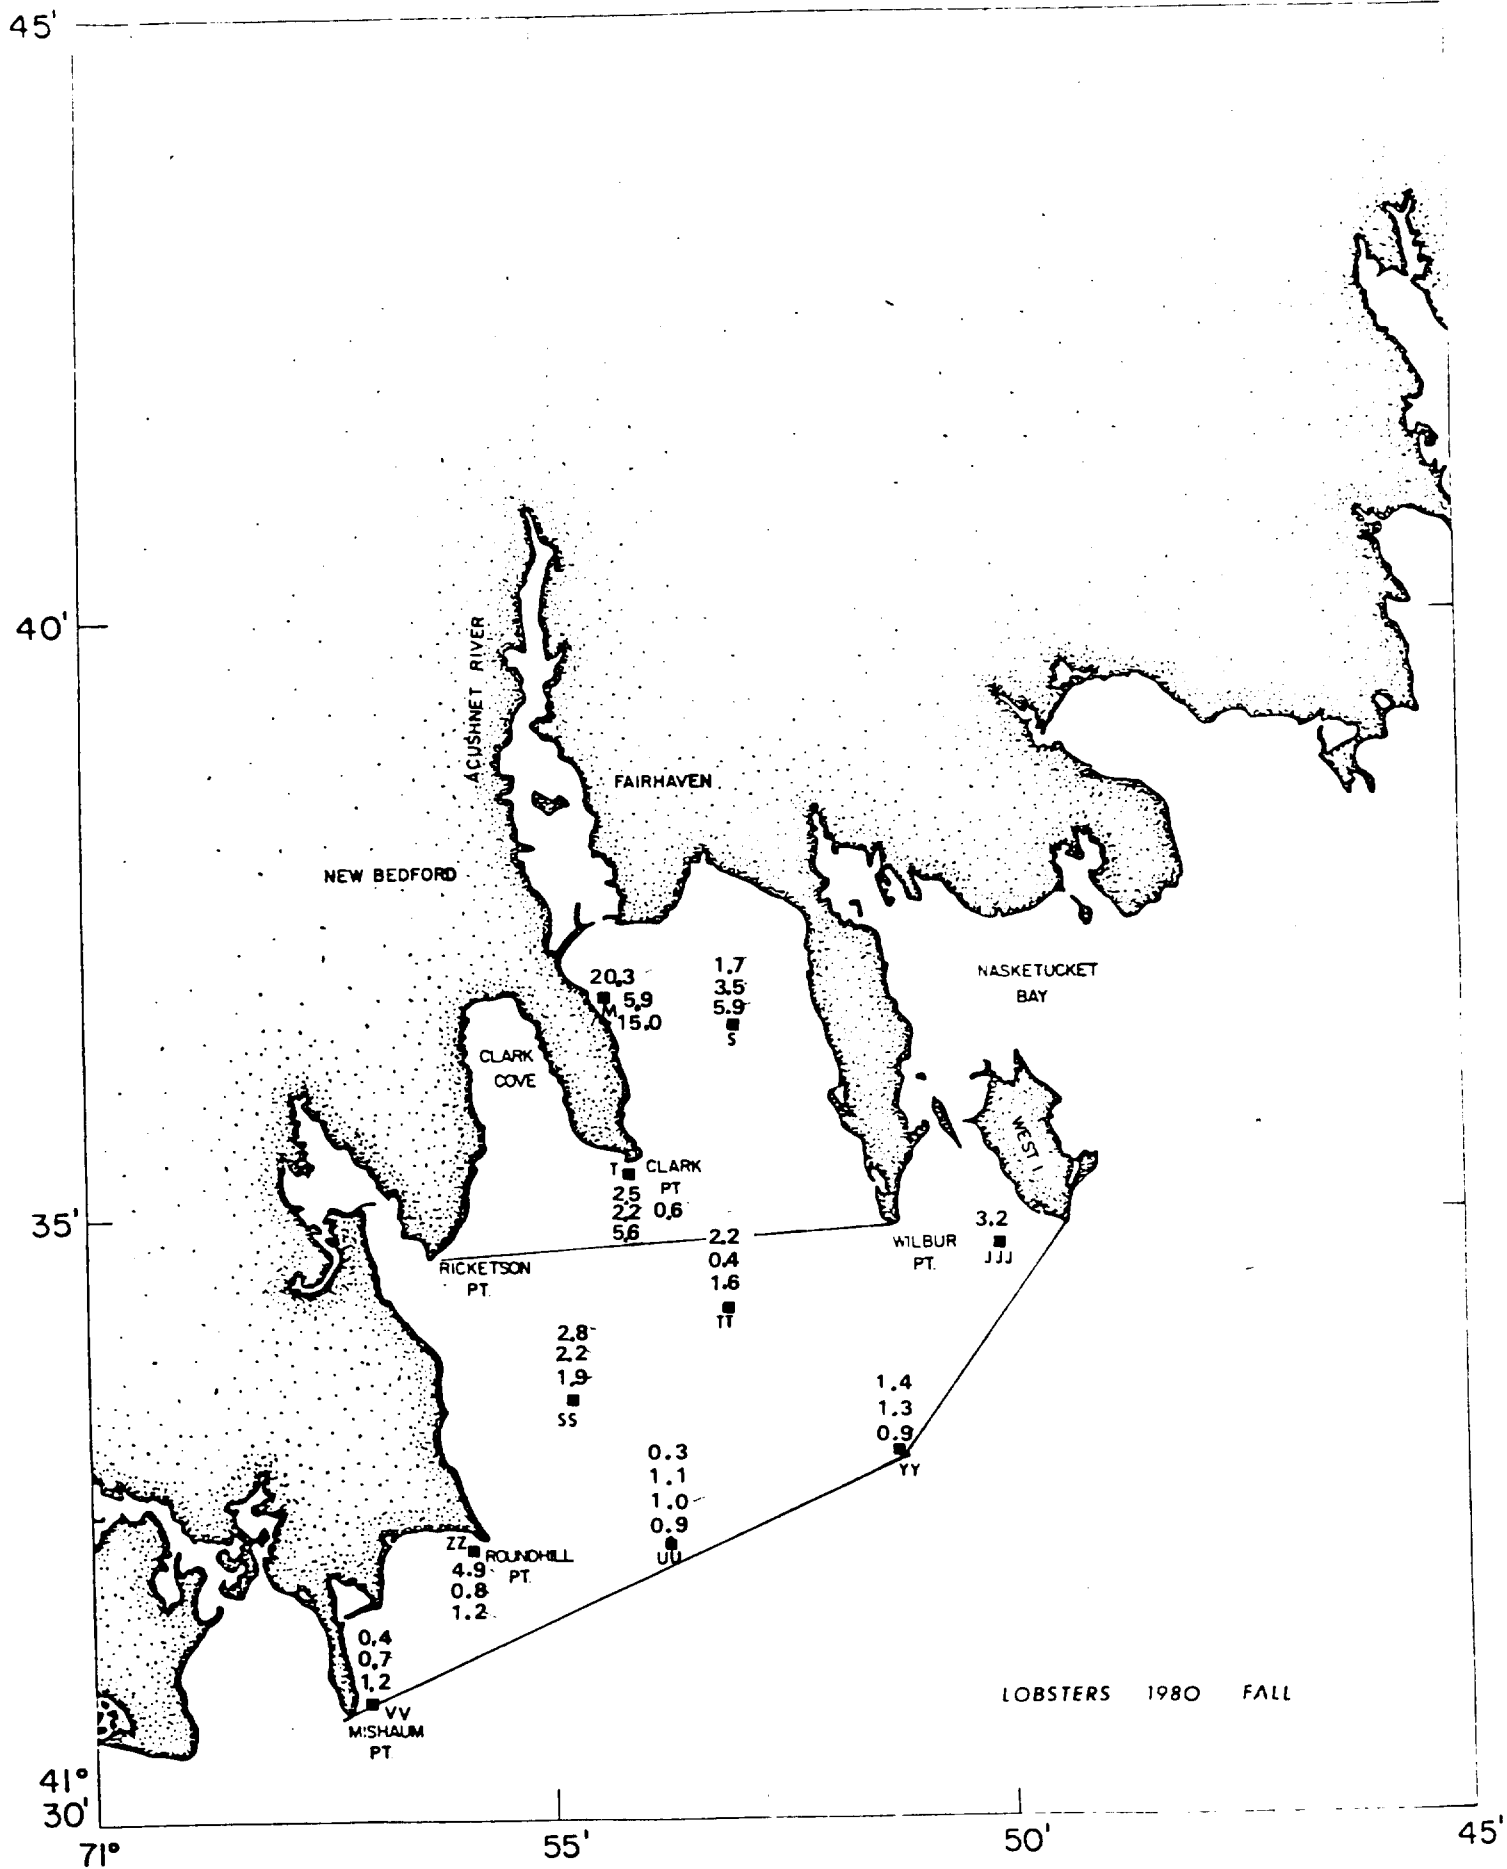

SUEJECT: PCB's

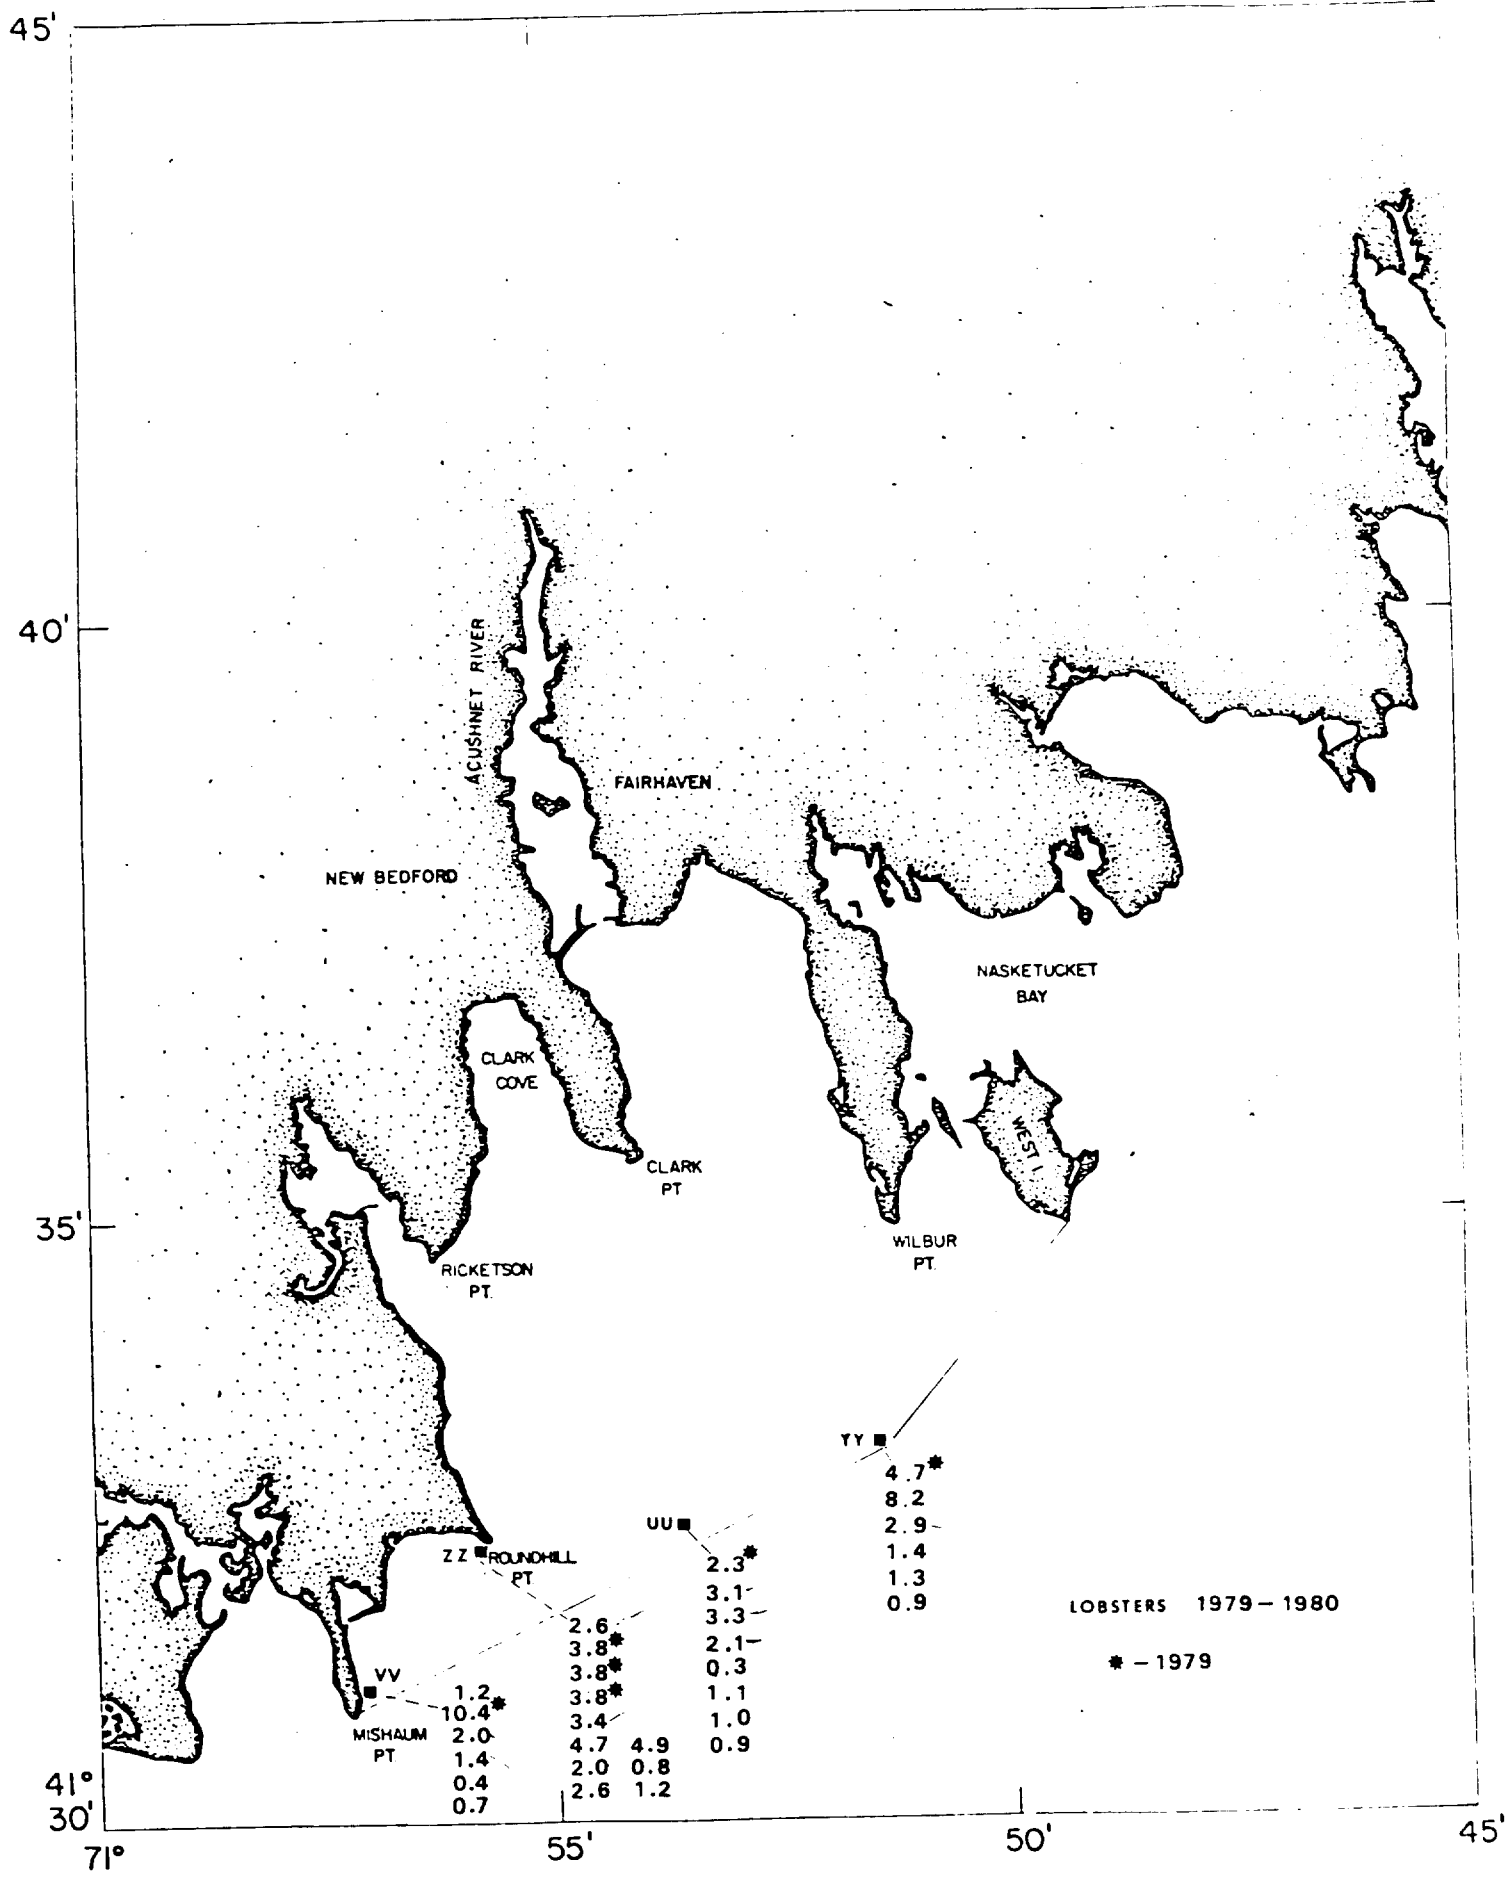

DATE: March 19, 1981

I have attached maps of the New Bedford area which indicates PCB results of finfish which have not exceed the Federal Action Limits since 1977. I have also included the PCB levels of lobsters taken from the four southern most sampling sites and the results of the fall 1980 lobster sampling. You will recall that you requested this information at the Area Team meeting on March 9, 1981.

Russ Ceurvels will be analyzing the fall 1980 finfish shortly. I can compose those results in the same manner if you desire.

cc: Philip G. Coates
